

## XPR Micro-Analytical Balances

### Direct Dosing of Very Small Samples

METTLER TOLEDO's new XPR micro-analytical balances allow you to weigh the smallest amounts of your precious samples directly into a tare container.

Discover XPR Micro-Analytical:

- Fast and stable results
- Less sample transfer – no more back-weighing
- Weigh 1.4 mg at 52 g capacity (according to USP)
- Fast stabilization – perfect for fume cupboards

## Trusted Results Means More than Collecting Data

- Are you sure all your weighing data has been recorded correctly?
- Are there any mistakes in your calculations?
- Will your data pass an audit?
- How secure are your processes?

METTLER TOLEDO's LabX software provides ultimate security and ensures full data integrity thanks to central instrument, task and user management, SOP user guidance and elimination of manual transcription
